

RIJKSDIENST VOOR GEDEELD BEHEER

Shared Stewardship Authority

Annual Report · Fiscal Year 2030–2031
regio Oost-Nederland · Eastern Netherlands

“*My farmers are not afraid
of apps. They are afraid of the
forms the app is connected to.*”

“*Mijn boeren zijn niet bang voor apps.
Ze zijn bang voor de formulieren
waar de apps aan vastzitten.*”

Senior farm advisor, Eastern Netherlands,
in conversation with a visiting researcher, 16 April 2026.
Quoted in the founding text of this Authority.

What you are looking at

This is the second annual report of a Dutch government authority that does **not yet exist**. The institution recognises and pays for the invisible labour that currently keeps Dutch precision-agriculture running — farm advisors debugging logins on platforms they do not own, farmers translating their knowledge into machine-readable forms, the WhatsApp groups titled “*what to answer when the inspector asks...*”

In this 2031, EU subsidies are tied to ecological stewardship and articulation work, **not** to digitalisation milestones. Cooperatives have the statutory power to refuse private sustainability scorecards.

The substance of the report is constructed in dialogue with an interview conducted in Deventer on 16 April 2026 with a senior farm advisor at a regional cooperative. The institution does not exist. **The labour it counts is old.**

Take one.

Forty copies of the annual report are printed. Take one home. Read it on the train. The document is the argument.

Three impossible things

1. A new statutory state authority that recognises *articulation work*.
2. EU subsidies tied to stewardship, not to digitalisation milestones.
3. Cooperatives refusing private sustainability scorecards on behalf of their members.
