What you are looking at.

This is the second annual report of a Dutch government authority that does **not yet exist**. It recognises and pays for the invisible labour the precision-agriculture system makes farm advisors do.

In this 2031, EU subsidies are tied to stewardship and articulation work, **not** to digitalisation milestones. Cooperatives can refuse private sustainability scorecards.

Built from an interview with a real Dutch farm advisor, April 2026.

The institution does not exist. The labour it counts is old.
